

TOD-0590 Flood Detector

These detectors are used in places such as homes, warehouses, kitchens, bathrooms, and other areas with potential flood risks.

They activate an alarm state when their stainless steel probes are short-circuited and provide an audible warning via the built-in buzzer.

General Features

- Audible Warning in Alarm Condition
- Dual-Color LED Indicator
- High EMI/RFI Immunity
- Stainless Steel Probes
- Automatic Reset

COMPATIBLE WITH ALL ALARM SYSTEMS, SMART HOME, AND AUTOMATION SYSTEMS

Technical Specifications

	TOD-0590
Input Voltage	10-26V DC
Operating Current	<10mA (12V DC)
Alarm Current	<60mA
Relay Output	NC/NO
Operating Temperature	-10/+55°C
Dimensions	92x67x26.4mm
